

presents online course:

Geotechnical Drilling for non-drillers

Is this the course for you?

This course is ideal for people working in the civil construction and mining sectors who have a need to broaden their knowledge on different geotechnical drilling types and techniques. It provides information to enable you to engage confidently with a drilling program. It is not intended for drillers, but for those who have a role in designing and managing drilling programs.

Content includes different equipment types and methods widely used and the advantages and disadvantages of each of them. It touches on causes and remedies for problems that may arise onsite and provides strategies for basic troubleshooting.

There is an assessment to complete at the end and a certificate of completion will be issued upon passing.

How does it work?

The course is online and self-paced. Once the applications process is complete, you will receive log-in details to access the course. You have three months to complete the course.

We have a course trainer available to provide assistance with content as necessary.

To pass the course, you must download and complete an open-book assessment. Assessment are marked by the course trainer.

Upon completion, you will receive a certificate of completion

For all enquiries please contact:

Phone: (08) 6305 0466

Email: info@adia.com.au

Content includes

- Drilling objectives, applications and industry sectors
- The fundamentals of drilling a hole
- Importance of drilling fluids and their application
- Introduction to the different sampling systems and their uses
- Geotechnical drilling methodology
- Geotechnical rig types and common sampling tooling.
- Fishing solutions
- Safety around the work site
- Glossary and acronyms

The course costs \$455 +GST for ADIA members and \$525 +GST for non members. This price includes all reference and training materials and online support.
